SUMMARY

A highly driven Computer Science undergraduate with a strong foundation in full-stack web development, AI research, and data science. Demonstrated ability to independently build projects from scratch, including fine-tuning large language models, designing resume generators, and launching micro-startups. Passionate about developing meaningful, user-focused solutions blending software engineering, machine learning, and business acumen.

EDUCATION

- **Shri Shankaracharya Institute of Technology** Raipur, CG
Bachelor of Technology in Computer Science Engineering Oct. 2022 – June 2026
- **Krishna Public School International** New Raipur, India
PCM with Computer Science; GPA: 3.3; Percentage 83% Aug. 2016 – July 2022

EXPERIENCE

- **Thought Applied Creation** Raipur, CG
Web Development June 2024 – July 2024
 - **Full-Stack Web Development:** Built dynamic web applications using HTML, CSS, JavaScript, PHP, and MySQL. Delivered end-to-end features with authentication, interactive UIs, and backend logic.
 - **Backend and Database Integration:** Implemented structured MySQL storage, login systems, and modular backend logic using secure PHP practices.
 - **Responsive Frontend Design:** Applied clean UI principles and responsive layout strategies using vanilla JS and CSS.
- **Ray's IT** Raipur, CG
Java Development May 2025 – June 2025
 - **Core Java Programming:** Built clean, efficient Java programs focusing on syntax, logic, and reusability.
 - **Object-Oriented Principles:** Applied OOP (inheritance, encapsulation, polymorphism, abstraction) to build modular Java solutions.
 - **Exception Handling and File I/O:** Used custom exceptions and file handling (Java I/O) to develop stable applications.
 - **MySQL Integration with JDBC:** Connected Java apps to MySQL using JDBC for real-time CRUD functionality.

PROJECTS

- **VISION — LLM Fine-Tuning (In Progress): Current Work:** Curated 10.6GB+ of conversational data (Wikipedia data, Reddit, AITA, Chats, Different Datasets) and building preprocessing pipeline for 6.1M text pairs.
Goals: Achieve emotional realism in responses and make it a super intelligent chatbot.
Skills Applied: Data cleaning, PyTorch, transformer architectures, and optimization techniques.
- **Resume Generator Web App:** Flask + HTML/CSS app where users fill a form to generate PDF resumes instantly. Useful for students and developers to automate resume creation.
- **Heart Disease Predictor (ML Project):** Linear regression model using real medical datasets from Kaggle. Focused on EDA, correlation analysis, and health indicator predictions. Delivered clean UI with result summaries.
- **Love Charts — Personalized Relationship Charts:** A creative analytics tool that turns emotional milestones into shareable visual charts. Built a web-app with HTML/CSS and JS, it is also hosted . Users submit their chat's data, which are turned into aesthetic charts to reflect patterns and emotions over time. Designed as a romantic novelty with viral potential on Instagram. Focused on design, emotion-driven data, and monetization via chart requests.

PROGRAMMING SKILLS

- **Languages:** Python, JavaScript, HTML, CSS, SQL, Java, Bash
- **Technologies & Tools:** PyTorch, Scikit-learn, Pandas, NumPy, JSONL, Flask, Git, GitHub Pages, RunPod, Ollama, VS Code, Canva
