## SUMMARY

---

CS undergrad specializing in ML/AI with hands-on experience deploying real-world government apps (10k+ users) and building transformer-based models (124M params). Skilled in end-to-end dev from data pipelines to deployment. Passionate about building intelligent systems and open-source tools for the community.

## EDUCATION

---

- **Shri Shankaracharya Institute of Technology** Raipur, CG  
*Bachelor of Technology in Computer Science Engineering* Oct. 2022 – June 2026

## EXPERIENCE

---

- **State Government of Chhattisgarh** Raipur, CG  
*Project Lead — Mobile & Web Application Development (Live Project)* June 2025 – Aug 2025
  - **End-to-End Development:** Spearheaded the design and development of government apps/websites such as *GreenPalnaYojna* and *HariharPathshala*, digitizing manual processes for thousands of citizens.
  - **Impact:** Platforms collectively served **10,000+ users**, reducing paperwork and saving **100+** of man-hours by moving government entries fully online.
  - **AI Integration:** Implemented an **AI-based image recognition** feature to automatically identify plant species for *GreenPalnaYojna*, improving accuracy and user experience.
  - **Backend & Security:** Built secure authentication systems, REST APIs, and structured databases ensuring reliable and safe citizen data handling.
  - **Deployment & Hosting:** Deployed solutions on a Linux server via SSH with production-grade reliability.
  - **Recognition:** Awarded a certificate of appreciation **by the District Collector** on Independence Day (15 August) for successful project delivery.

## PROJECTS

---

- **VISION – 124M Parameter AI Model (<https://dhamejanishivam.github.io/vision>):** Designing and training a **124M parameter transformer model** with a curated corpus of *10GB+* (*Wikipedia, Reddit, Common Crawl*). Building a scalable pipeline for billions of text pairs. Currently it is in progress **Goal:** Achieve human-like realism in dialogue and build an intelligent AI agent.  
**A MVP version of this model is live at : <http://165.22.208.62:4998>**  
**Skills:** PyTorch, Transformer architectures, Data pre-processing, distributed training, optimization
- **Resume Generator Web App:** Flask + HTML/CSS app where users fill a form to generate PDF resumes instantly. Useful for students and developers to automate resume creation. Live at: <https://dhamejanishivam.github.io/resumeAi>
- **Love Charts — Chat-Based Relationship Analytics:** Built a web app that processes WhatsApp chat data into personalized relationship charts using Python, HTML/CSS, and JavaScript. Designed for Instagram virality with user-uploaded text and emotion-based analytics. Live at: <https://lovecharts.github.io>

## TECHNICAL WRITING & COMMUNITY

---

- **Technical Blog (Open-Access):** Author of 5k+ words of guides on AI/ML (e.g., Transformers, Prompt Engineering) with code examples; maintained as an open-source, ad-free resource for developers.

## PROGRAMMING SKILLS

---

- **Languages:** Python, C++, JavaScript, SQL, Bash
- **Tools & Frameworks:** PyTorch, TensorFlow, Huggingface, Scikit-learn, Pandas, NumPy, Flask, React, Node.js, Git, GitHub, Jupyter, Figma, JSONL
